The ability to make both businesses and consumers more secure online and on computer networks is a crying need world-wide. This, and will remain, one of the world's fastest-growing industries. This growth is fueled by: continuing massive movement of activities to online methods, constant development of new digital security technologies, and, unfortunately, a continuing ability of cybercriminals, hackers and fraudsters to outsmart de-fensive maneuvers. Meanwhile, annual losses to cyberfraud are in the hundreds of billions of dollars worldwide, and we are all under constant attack. This is a must-have Plunkett title.

Both consumers and enterprises have shown tremendous enthusiasm for banking online, making payments online and managing their investments online. The incredible popularity and growth of tools like Zelle and Paypal on the payments side, plus Robinhood and Mint on the investment management side are good examples of the immense potential of this industry. Related are such new developments as cryptocurrencies like Bitcoin, money transfer tools like ACH and instant payments, along with new ways to make everyday purchases like Apple Pay and Google Pay. Once again, Plunkett Research helps you to stay on top of one of the world's fastest changing industries.
